Compensation for Directors who have executive functions (excluding Outside Directors and Directors who are Audit and Supervisory Committee members) is composed of basic compensation and restricted stock compensation. Basic compensation is composed of two types: monthly fixed monetary compensation, and performance-linked compensation that is provided according to performance. The amount of the fixed compensation is decided with consideration for the overall professional duties, contribution, and other factors of each Director, and is reviewed each year based on a report from the Nomination and Compensation Advisory Committee. The amounts of

performance-linked compensation are determined based on the degree of achievement of business result indexes and the amount of operating profit. The amounts of restricted stock compensation are determined upon having comprehensively taken into account consolidated financial results, each Director's professional duties, contribution, and other factors. Compensation, etc. for Outside Directors who have supervisory functions and Directors who are Audit and Supervisory Committee members is limited to fixed compensation from the perspective of ensuring their independence.

(Application of the "Accounting Standard for Current Income Taxes," etc.)

The Company has applied the "Accounting Standard for Current Income Taxes" (ASBJ Statement No. 27, October 28, 2022; the "Revised Accounting Standard of 2022"), etc. from the beginning of the current fiscal year. Revisions to categories for recording current income taxes (taxation on other comprehensive income) conform to the transitional treatment in the proviso of paragraph 20-3 of the Revised Accounting Standard of 2022 and to the transitional treatment in the proviso of paragraph 65-2(2) of the "Guidance on Accounting Standard for Tax Effect Accounting" (ASBJ Guidance No. 28, October 28, 2022; the "Revised Guidance of 2022"). This change in accounting policies has no impact on the consolidated financial statements.

In addition, for changes related to the revised treatment in consolidated financial statements when a gain or loss on sale arising from the sale of shares of subsidiaries, etc. among consolidated companies is deferred for tax purposes, the Revised Guidance of 2022 has been applied from the beginning of the current fiscal year. These changes had no effect on consolidated financial statements.

# **Notes on Accounting Estimates**

(Recoverability of deferred tax assets)

(1) Amounts recorded in the consolidated financial statements for the fiscal year under review Deferred tax assets 121 million yen

(2) Information on the content of significant accounting estimates for identified items Deferred tax assets are recorded for future deductible temporary difference for which it is considered that taxable income based on a future profit plan can be secured sufficiently and that it has recoverability. Since recoverability of deferred tax assets relies on an estimate of future taxable income, if any change occurs in conditions and assumptions on which the estimate is based, the amounts of deferred tax assets and income taxes deferred may be affected significantly in the consolidated financial statements for the following fiscal year. In the estimation of a future profit plan, the Group refers to past records and uses the gradual decrease ratio of net sales of existing games and net sales after service launch of new games to make estimates.

#### **Notes on Financial Instruments**

- (1) Matters relating to status of financial instruments
  - 1) Policy for handling financial instruments

The Group principally covers its financial needs with internally generated funds. Funds are mainly managed through short-term deposits, etc.

Derivative transactions (equity index future contracts) are managed by taking into account the market risks and positions in the listed stock market.

2) Details of financial instruments and associated risks

Accounts receivable - trade and contract assets, which are operating receivables, are exposed to credit risks of customers.

Operational investment securities and investment securities mainly consist of shares and bonds, etc., each of which are exposed to the issuer's credit risk, the risk of interest rate fluctuations and the risk of market price fluctuations.

Shares of subsidiaries and associates, and investments in capital of subsidiaries and associates are not exposed to the risk of market price fluctuations, since these securities are not measured at fair value.

Accounts payable - other and income taxes payable, which are operating payables, mostly become due for settlement or payment within one year.

Long-term borrowings are borrowings from financial institutions and are exposed to liquidity risk.

Monetary receivables and payables denominated in foreign currencies and securities denominated in foreign currencies are exposed to the risk of foreign exchange rate fluctuations.

Derivative transactions are exposed to the risk of fluctuations in equity indices.

- 3) Management system for risks associated with financial instruments
- a. Management of credit risk (such as risk associated with nonfulfillment of contracts by business partners)

  For operating receivables, the Group has sales staff to periodically monitor the status of major business partners and manage due dates and balances for each business partner in accordance with internal regulations and other rules, while striving to quickly notice and mitigate any concerns on the collection of claims that might be caused by a business partner's deteriorated financial conditions, etc.
- b. Management of market price fluctuation risk
  - The Group strives to periodically obtain fair values, equity indices and other information to mitigate risks.
- c. Management of foreign currency risk (fluctuation risk from foreign exchange)

  For monetary receivables and payables denominated in foreign currencies and securities denominated in foreign currencies, exchange rate fluctuations are monitored.
- d. Management of liquidity risk related to procurement of funds (risk of being unable to carry out payment by the payment deadline)

The responsible department conducts monitoring related to operation of funds at suitable times, and manages liquidity risk by means such as maintaining on-hand liquidity.

4) Supplementary explanation regarding fair values of financial instruments

Fair values of financial instruments include theoretical values that are reasonably calculated. Because these calculations are based on certain assumptions, applying different assumptions may result in different fair values.

## (2) Matters relating to fair values of financial instruments

Amounts on consolidated balance sheet, fair values, and differences between them are as follows.

(million yen)

	Amounts on consolidated balance sheet	Fair values	Differences
(1) Operational investment securities	215	215	-

Total assets	8,464	8,464	-
(1) Long-term borrowings (including current portion)	999	992	(7)
Total liabilities	999	992	(7)

- (Notes) 1. Notes on cash are omitted. "Deposits," "accounts receivable trade, and contract assets," "accounts payable other," and "income taxes payable" are omitted, because they comprise short-term instruments whose carrying amount approximates their fair value.
  - Consolidated balance sheet amounts of shares, etc. with no market price
     Shares, etc. with no market price are not included in "(1) Operational investment securities" or "(2) Investment securities."

(million ven)

Investments in capital of subsidiaries and associates (*)	12

<sup>(\*) &</sup>quot;Investments in partnerships" included in "investments in capital of subsidiaries and associates" are not subject to disclosure of fair value in accordance with paragraph 24-16 of the "Implementation Guidance on Accounting Standard for Fair Value Measurement" (ASBJ Guidance No. 31, June 17, 2021).

## (3) Fair value information by appropriate classification within the fair value hierarchy

The fair value of financial instruments is classified into the following three levels according to the observability and materiality of inputs used to measure fair value.

Level 1 fair value: Fair value measured using observable inputs, i.e. quoted prices in active markets for

assets or liabilities that are the subject of the measurement

Level 2 fair value: Fair value measured using observable inputs other than Level 1 inputs

Level 3 fair value: Fair value measured using unobservable inputs

If multiple inputs are used that are significant to the fair value measurement, the fair value measurement is categorized in its entirety in the level of the lowest level input that is significant to the entire measurement.

# 1) Financial instruments recognized at fair value on the consolidated balance sheet

(million yen)

Classification		Fair va	` .	
Classification	Level 1	Level 2	Level 3	Total
Operational investment securities	118	96	-	215
Investment securities Available-for-sale securities	3,344	4,905	-	8,249
Total assets	3,463	5,001	_	8,464

### 2) Financial instruments other than those recognized at fair value on the consolidated balance sheet

(million ven)

Classification	Fair values			
Classification	Level 1	Level 2	Level 3	Total
Long-term borrowings (including current portion)	_	992	_	992
Total liabilities	-	992	-	992

(Note) A description of the valuation techniques and inputs used in the fair value measurements

## Operational investment securities

The fair value of listed shares is based on the prices quoted by stock exchanges. As listed shares are traded in active markets, their fair value is classified as Level 1.

As the quoted prices of unlisted shares, etc. in active markets are unavailable, they are measured based on a certain valuation technique using observable inputs and classified as Level 2.

#### Investment securities

The fair value of listed shares is based on the prices quoted by stock exchanges. As listed shares are traded in active markets, their fair value is classified as Level 1.

Bonds are based on the price at which they were obtained from the counterparty financial institutions. Because bonds are not recognized as market prices in active markets, the fair value is classified as Level 2.

## Long-term borrowings

Because the total amount of principal and interest is calculated based on the current price discounted at the expected interest rate when conducting new similar borrowings, it is classified as Level 2.

Therefore, they are not included in "Revenue from contracts with customers." In accordance with the Accounting Standard for Revenue Recognition, the prices of user charges, sales of crypto-assets, and other income (including funds procured by Initial Exchange Offering (IEO)) are recorded as advances received, and are reclassified as revenue in stages as the crypto-assets are used within the game.

Other revenue in the Investment and Development Business is primarily revenue related to investments in capital of investment limited partnerships or other similar partnerships based on the Accounting Standard for Financial Instruments (ASBJ Statement No. 10), and is classified under paragraph 3 (1) of the Accounting Standard for Revenue Recognition. Therefore, they are not included in "Revenue from contracts with customers."

The main economic useful lives are as follows:

Buildings and structures 5 to 18 years Tools, furniture and fixtures 2 to 10 years

## 2) Intangible assets

The straight-line method is applied.

Software for internal use 5 years

## (4) Standards for recognition of reserves

## Allowance for doubtful accounts

For loss caused by uncollectible debt, an estimated amount of irrecoverable debt is provided as an allowance for doubtful accounts based on the historical write-off rate for ordinary receivables, and based on the recoverability of individual cases for specified receivables such as debt with a possibility of default.

# (5) Standards for recognition of significant revenues and expenses

The Company recognizes revenues based on the following five-step model.

Step 1: Identify the contract(s) with a customer

Step 2: Identify the performance obligations in the contract

Step 3: Determine the transaction price

Step 4: Allocate the transaction price to the performance obligations in the contract Step 5: Recognize revenue when (or as) the entity satisfies a performance obligation

Revenue recognition standards for each main revenue classification are as follows. The amounts of consideration promised are generally received within one year and do not include significant financing components.

1) Revenue from user charges

The Company offers smartphone games. While providing games to users for free, the Company provides the items used in these games for value. For these services, the Company judges that its performance obligations are satisfied when providing the services set forth for each item while users, or its customers, play games using the items obtained by consuming their currency in value. Therefore, the Company estimates the usage period of customers and recognizes revenue over such usage periods.

2) Revenue from revenue sharing

The Company collaborates with other companies to develop and operate smartphone games. For these services, the Company judges that its performance obligations are satisfied when it provides services such as development and operations to its client companies. Therefore, the Company recognizes revenue upon completion of relevant service provisions. In addition, the Company measures the consideration received from customers according to the amount of user charges.

(6) Accounting policy for translation of foreign currency assets or liabilities into Japanese yen

Monetary receivables and payables in foreign currencies are translated into Japanese yen at the spot exchange rate prevailing as of the balance sheet date, and translation differences are accounted for as profit or loss.

# **Notes on Change in Accounting Policy**

(Application of the "Accounting Standard for Current Income Taxes," etc.)

The Company has applied the "Accounting Standard for Current Income Taxes" (ASBJ Statement No. 27, October 28, 2022; the "Revised Accounting Standard of 2022"), etc. from the beginning of the current fiscal year. Revisions to categories for recording current income taxes conform to the transitional treatment in the proviso of paragraph 20-3 of the Revised Accounting Standard of 2022, and there is no effect on the financial statements.

(Recoverability of deferred tax assets)

- (1) Amounts recorded in the non-consolidated financial statements for the fiscal year under review Details are specified in "Notes on Tax Effect Accounting."
- (2) Information on the content of significant accounting estimates for identified items

Deferred tax assets are recorded for future deductible temporary difference for which it is considered that taxable income based on a future profit plan can be secured sufficiently and that it has recoverability.

Since recoverability of deferred tax assets relies on an estimate of future taxable income, if any change occurs in conditions and assumptions on which the estimate is based, the amounts of deferred tax assets and income taxes - deferred may be affected significantly in the financial statements for the following fiscal year.

In the estimation of a future profit plan, the Company refers to past records and uses the gradual decrease ratio of net sales of existing games and net sales after service launch of new games to make estimates.
